

RODOLFO MARBAN ESTRADA

Full Stack Developer | Microservices, DDD, CQRS, RabbitMQ, Angular, .NET

Cuernavaca, Morelos, Mexico | Email: marbanappdev@gmail.com | Phone: +52 777 133 17 01

LinkedIn: [linkedin.com/in/rodolfo-marban-a18a17230](https://www.linkedin.com/in/rodolfo-marban-a18a17230) | GitHub: github.com/RodolfoDevApp | Portfolio: rodolfodevapp.github.io/RMCV

PROFESSIONAL SUMMARY

Full stack software developer with more than 6 years of experience building enterprise web applications. Recent work focused on microservices architectures, DDD and CQRS, asynchronous messaging with RabbitMQ, and microfrontend approaches. Strong experience designing, developing and maintaining scalable solutions using technologies such as Angular and .NET, working closely with cross functional teams in agile and remote environments.

KEY SKILLS

Architecture and patterns: Microservices, DDD, CQRS, Event Driven, Clean Architecture, Hexagonal Architecture.

Frontend: Angular, Angular Material, JavaScript, TypeScript, RXJS, Bootstrap, microfrontends.

Backend: .NET Core, ASP.NET, C#, VB.NET, Java.

Databases: SQL Server, PostgreSQL. Messaging: RabbitMQ.

Tools and DevOps: Git, GitHub, Jira, Azure, Docker, Docker Compose, Visual Studio, VS Code.

Other: REST APIs, SOLID principles, basic unit testing.

PROFESSIONAL EXPERIENCE

NorthWare | Full Stack Developer (Remote) | Aug 2022 - Jun 2025

- Collaborated on the creation of new internal applications and on extending features in existing solutions, from requirements analysis through to production deployment.
- Worked closely with QA and business stakeholders to ensure the applications met user stories and acceptance criteria, adjusting implementations based on feedback and test results.
- Contributed to continuous improvement initiatives, reviewing code, proposing optimizations and helping maintain functional and technical documentation.

Inetum | Frontend Developer (Remote) | Mar 2020 - Aug 2022

- Built user interfaces and frontend modules for enterprise applications, following UI designs and product guidelines.
- Collaborated with designers, analysts and QA to validate user stories, detect issues early and ensure deliveries matched expectations.
- Supported integration between frontend modules and internal services, keeping business flows and navigation consistent across the application.

RUNSA | Full Stack Developer (Mexico City) | Mar 2019 - Mar 2020

- Developed internal applications and web portals, implementing new features and fixing issues reported by business areas.
- Participated in system analysis, problem diagnosis and preventive maintenance to keep company platforms stable and available.

EDUCATION

BSc in Information Technologies Engineering - Universidad Emiliano Zapata, Morelos, Mexico.

HIGHLIGHT PROJECTS

Personal portfolio: rodolfodevapp.github.io/RMCV.

EventShop microservices ecosystem (reference e-commerce platform):

- Catalog service (.NET / product catalog): github.com/RodolfoDevApp/catalog.
- Orders service (Java / order management): github.com/RodolfoDevApp/orders-service.
- Carts service (Java / shopping cart): github.com/RodolfoDevApp/carts-service.

- Payments service (Java / payments integration): github.com/RodolfoDevApp/payments-service.

RabbitMQ messaging library for microservices: EventShop.Messaging.Java.

LANGUAGES

Spanish (native), English (intermediate).
